PRODUCT UPDATE: NUTRISON ESSENTIAL RANGE ENHANCEMENT

Nutricia is excited to share some improvements to our Nutrison range, which includes **Nutrison**, **Nutrison Energy**, **Nutrison Multi Fibre**, and **Nutrison Energy Multi Fibre**. These updates are part of our commitment to providing the best nutritional support for those who rely on tube feeding.

Here are the **two main changes**:

1. **Enhanced Vitamins:** We've increased the levels of Vitamins D, B, and C in our products. This means better support for your overall health, with Vitamin D now meeting the latest guidelines.
2. **New Protein Blend:** Our P4 protein blend now has more plant-based proteins, going from 40% to 78%. This change aims to offer a more balanced and nutritious option.

These updates are designed to improve the nutritional quality of our products and support your health and well-being.

Details for the old and new products are outlined in the table below.

New product details:
